

2014 Global Call for Mobilizations

RECLAIM
POWER

Linking struggles for transformation of energy systems...

- Against dirty energy
- For people's rights to energy for basic needs
- For public and community-controlled renewable energy

...and stopping the climate crisis!

September 15 – 22: Peoples' Climate Mobilizations

On September 23, the UN is convening a Climate Summit of world leaders to address the climate crisis. On September 21, there will be a People's Climate March in New York City.

Let us organize actions in our own countries in the days leading up to the UN Climate Summit and the weekend of the People's Climate March! Let us demonstrate global solidarity and growing grassroots power to address climate change linked with related issues of energy, economy, and justice.

To get action ideas and resource materials, to share your plans and find out what others are up to, visit www.peoplesclimate.org and www.reclaimpower.net/september

October 10 – 18: Global Week of Action on Energy

The week of October 10 to 18 will be a global convergence of efforts to raise the urgency of transforming energy systems at the local, national and global levels and assert **peoples energy demands**:

- Ban on new dirty energy projects
- End to government subsidies and public handouts to dirty energy companies
- Stop excessive energy consumption by corporations and global elites
- Redirect and mobilize public finance to ensure people's universal access to energy
- Make the complete shift to public and community/decentralized renewable clean energy systems as quickly as possible.

The week will include days of action against dirty energy — coal; fracking, oil, nuclear, mega-dams, waste incineration and agrofuels. We will also highlight **public and community controlled alternative energy systems** that work for people and the planet. Visit www.reclaimpower.net for more information, action ideas, sharing of plans and resource materials, for connecting with struggles and campaigns on energy.
